EXPERIENCE

75 Ways Technologies

Jan 2025 – Present

Associate Software Developer

Mohali, India

- Joined as a Software Developer Intern and earned a full-time promotion to Associate Software Developer based on performance and project contributions.
- Developed and maintained production-grade web applications using the MERN stack and Next.js across multiple client projects.
- Designed and optimized RESTful APIs, database schemas, and backend services to improve application scalability and reliability.
- Built SEO-friendly server-side rendered applications with Next.js, enhancing performance and search engine visibility.
- Developed customer-facing features and backend integrations for an e-commerce platform using Next.js and Shoptline.
- Refactored existing codebases and created reusable components, improving maintainability and accelerating feature development.
- Collaborated with cross-functional teams to deliver high-quality solutions and ensure timely project releases.

PROJECTS

E-Commerce Platform | *JavaScript, Next.js, Firebase, Tailwind CSS, Stripe*

- * Developed a full-featured e-commerce platform including admin panel and customer-facing storefront.
- * Implemented product management, order tracking, featured listings, and role-based admin controls.
- * Integrated secure payment processing using Stripe and authentication using Firebase.
- * Focused on modular architecture and reusable components to improve scalability and maintainability.

Price Alert App | *React, Node.js, MongoDB, Puppeteer*

- * Built a price monitoring system that tracks product price fluctuations and triggers alerts on price drops.
- * Developed backend services for automated web scraping using Puppeteer and scheduled data updates.
- * Designed efficient MongoDB schemas to handle large datasets and historical price tracking.

Atlas Messenger (Internal Testing) | *Flutter, Express.js, MongoDB, Socket.IO*

- * Developed a real-time messaging platform with one-to-one and group conversations, currently distributed through Google Play Internal Testing.
- * Built a scalable backend using Express.js, MongoDB, and Socket.IO, enabling low-latency messaging, message status updates, and user presence tracking.
- * Implemented an offline-first architecture using Drift for local data persistence and synchronization, ensuring reliable messaging during network interruptions.
- * Integrated media sharing via Cloudflare R2 and push notifications using Firebase Cloud Messaging (FCM) to enhance user engagement and communication.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, Java

Frontend: React.js, Next.js, React Native, Flutter, Tailwind CSS, Styled Components

Backend: Node.js, Express.js

Databases: MongoDB, Firebase

Tools: Git, Postman, Axios, Stripe

Concepts: REST APIs, Data Structures and Algorithms
